TONY TSHANDU

Junior Security Engineer · Security Automation · SOAR & SIEM

Sandton, South Africa • +27 79 237 9248 • 17tonydaniels@gmail.com • linkedin.com/in/tony-tshandu • github.com/httpstony

PROFESSIONAL PROFILE

I'm a security engineer who enjoys turning slow, manual security work into automation. I moved into cybersecurity from IT support and web development, and during my internship at Cyber1 Solutions I built SOAR playbooks and SIEM monitoring workflows, including SLA tracking for a major South African bank. I recently joined Maidar Secure full time and I'm finishing my IT diploma alongside work. Next, I want to go deeper into threat intelligence and offensive security.

PROFESSIONAL EXPERIENCE

Maidar Secure | *Junior Security Engineer* Oct 2026 - Present

Cyber1 Solutions | *Cybersecurity Engineer Intern* Jun 2026 - Oct 2026

- Built an SLA tracking pipeline in Devo SOAR (LogicHub) for a major South African bank, timing every Zoho Desk ticket against notify, escalate, respond and resolve targets.
- Wrote the logic in Python and SQL: ticket state tracking, severity-based breach windows and a 44-field data model.
- Limited the live playbook to open tickets to avoid timeouts, keeping the breach dashboard refreshed every 3 minutes.
- Built a SIEM ingestion monitor in Strike48 Prospector Studio (YAML, Lua, Devo MCP) that compares daily event volumes with a 7-day baseline and writes LLM fault reports.
- Traced a 75% under-count in reported events (94 vs. 380) to a timestamp format bug in the monitor's queries, and fixed it.
- Designed the company's Strike48 access model, mapping job positions to groups and a small set of custom roles.
- Also wrote Devo LINQ queries, AI agent prompts for fraud risk scoring, and a self-service case export workflow for clients.

Dalom Investment Projects | *IT Technician* 2023 - 2026

- Built the company website (HTML5, CSS3) and ran its social channels, growing online engagement by 60% in six months.
- Designed and managed the SQL databases behind daily operations, with role-based access control.
- Resolved 15+ IT tickets a month and cut unauthorised access incidents by an estimated 40% with new access controls.

Earlier roles: Solutions Specialist, Solotek Power Africa (2021-2022) · Showroom Manager, I'm Healthy (2022) · Sports Coach, Bryanston High School (2020) · Brand Promoter & Events Coordinator, independent contractor (2019)

PROJECTS

- **AXIOM** (React, Anthropic API): actuarial app for premium pricing (SA85-90 tables), IBNR reserving and an AI assistant.
- **SDICMS** (React): proposal, sprint plan and login UI for a law enforcement case management portal.

EDUCATION

Richfield College | Diploma in Information Technology 2024 - 2026 (expected)

Secure Programming · Web Architecture · Relational Database Systems · Network Infrastructure · Information Assurance

Richfield College | BSc in Information Technology (Advanced Entry) 2026 - 2027 (expected)

Focus: Systems Security · Cloud Computing · Software Engineering

CERTIFICATIONS

Cisco CyberOps Associate *Completed*
Cisco Network Technician Career Path *Completed*
Google Cybersecurity Professional Certificate (Foundations of Cybersecurity, Play It Safe) *Completed*
CompTIA Security+ *In progress, expected 2027*
AI & Cyber Security One-Day Intensive, CDDTI *Completed*
Bitcoin Lightning Developer Bootcamp, Africa Free Routing *Completed*

SKILLS & INTERESTS

Languages: Python · SQL · Devo LINQ · Lua · YAML · JavaScript · React · HTML/CSS · C++ · Git/GitHub
Security: Devo SIEM · Devo SOAR (LogicHub) · SOAR playbook design · SIEM monitoring · Access control design · Zoho Desk
AI Tools: Strike48 Prospector Studio · Claude · ChatGPT · Gemini · Grok · Meta AI · GitHub Copilot · MCP
Blockchain: Bitcoin Script (P2SH, SegWit, multisig, timelocks) · Lightning Network
Interests: Chess · Tennis · Running · Soccer · Former national cheerleader
